Programs

Products to meet your needs

Whether you need an agency recognition such as UL or BS 5609, or a sustainable solution, we have a product for your application. Look for the designation in the following product tables.

Standard

- **Quick-ship:** Wide-web product constructions finished to your specifications — ships within 2 business days
- **Flexcon® FlexChoice™:** custom width program: offers smaller minimums for select Durables and Packaging products, where off-cuts remain with us — ships within 2 business days
- **Pre-finished inventory:** products are pre-slit or sheeted to the most popular sizes and quantities — ships same day

▲ FlexChoice™

Custom (Made-to-order, MTO)

Can use a combination of standard and non-standard raw materials.

- **Standard materials:** 10-14 days
- **Non-standard materials:** 60-90 days, based on raw material availability

Availability

Please contact your sales representative or visit flexcon.com for the most updated product offering and availability. This list does not reflect customer specific products. Your customer support team can help identify the classification of any products that don't appear on the published list.

Adhesives

For nearly seven decades, Flexcon's leadership in adhesive technologies has revolutionized thousands of products across dozens of industries. From standard to custom, simple to complex, we take a collaborative approach to providing best-in-class products that benefit your business and end users alike. Whether your priorities are safety, style, durability, or recyclability, we have products to meet your standards and exceed your expectations.

Built for everyday reliability

We believe that everyday items should still be exceptional. Our comprehensive line of general-purpose adhesives is designed to provide a strong balance of properties for dependable daily use. This includes beverage labeling, branding graphics, overlaminates, UV protections, and more.

Engineered for high-performance

Our high-performance adhesives offer superior quality and resistance against the most demanding, mission-critical conditions from chemicals, temperature extremes, direct skin contact, abrasion, and more. From tamper-evident labels to aggressive permanent adhesives, our products will maintain a strong bond built to withstand degradation from chemical, temperature, abrasion, and more.

We also provide removable solutions that meet extreme environmental and processing performance requirements.

Trusted for critical healthcare applications

Flexcon's healthcare adhesives are proven to deliver patient safety and comfort, every time. We offer a selection of medical adhesives for pharmaceutical and medical device labeling, wearables, diagnostics, and tapes. Our products meet applicable FDA standards and provide patient-friendly alternatives to reduce pain and allergic reactions.

Temporary when it needs to be

For permanent applications, our products may not need to last a lifetime, but they're anything but expendable. From bus wraps to window perforated films, our temporary adhesive products allow for a smooth, weather-resistant seal for incredible looking results. When it's time for a change, our components peel off without leaving any residue behind.

Sustainable solutions to benefit the planet

We develop eco-friendly components to enhance the recyclability of products without sacrificing aesthetics or causing mechanical issues at recycling plants. Our solutions include options for recycling of both HDPE and PET containers.

Application surface energy

Surface energy is the measure of excess energy at the surface of a material compared to its interior, influencing interactions like wetting and adhesion.

○ Low

- PVA
- Polystyrene
- EVA
- PE
- PP
- PVF, PVDF, PTFE
- Silicone

○ Medium

- Wood
- Nylon
- PMMA (Acrylic)
- PET
- PU Foam
- TPU
- PC
- PVC

● High

- Copper
- Stainless steel
- Aluminum
- Tin
- Ceramic
- Glass

Wetting occurs when a liquid spreads out uniformly over a material's surface.

Adhesion is the ability of a material to bond and adhere to a surface through physical or chemical interactions, keeping the materials securely connected.

Higher surface energy materials, such as glass and metals, promote stronger adhesion as they allow for better contact between the liquid (adhesive) and the solid surface. These materials have more available energy at their surface, making it easier for liquids to spread (or "wet out") across the surface.

Low surface energy materials, such as polyethylene (PE) and polypropylene (PP), generally exhibit poor adhesion and tend to repel liquids, making it challenging for adhesives to spread and create a strong bond.

Adhesive Guide

Consumer Packaging

Engineered for plastic, glass, aluminum, and flexible packaging.

We offer brands the most engaging and best performing packaging labels and materials that help them reach their sustainability goals.

Flexcon® EcoFocus® sustainable solutions - a series of pressure-sensitive label stocks designed with an added element of sustainability, such as enabling recyclability or compostability, the manufacture of materials from recycled content, biobased components or containing sustainably-sourced materials.

Key applications include: beverage labels, food packaging, household products, and personal care and cosmetics.

FlexChoice™ Packaging Products

This program allows you to order custom widths of specific products with smaller minimums, and fast turnaround. Visit www.flexcon.com/FlexChoice to view the list of products, locations, and minimums.

Consumer Durables

Performance for the real world.

Items intended to last for years need components that can withstand exposure to abrasion, harsh chemicals, UV rays, and more. Choosing materials that have been pushed to the limits ensures they will withstand the rigors of the real world.

Key applications include label substrates for brand identification, warning/instructional, compliance/tracking, and adhesive constructions for bonding and mounting.

FlexChoice™ Durables Products

This program allows you to order custom widths of specific products with smaller minimums, and fast turnaround. Visit www.flexcon.com/FlexChoice to view the list of products, locations, and minimums.

Healthcare

Advanced medical adhesives for wearables, diagnostics, and labeling solutions.

Superior quality is at the heart of every Flexcon healthcare medical adhesive product.

Key applications include: wearables, diagnostics, pharmaceutical, and medical device labels.

Industrial & Transportation

Durable solutions for tough applications and demanding environments.

Materials used in transportation and industrial applications are subjected to harsh environments and rigorous conditions. Feel confident in the performance of safety and identification labels and functional adhesive constructions in a variety of environments.

Key applications include: label substrates for brand identification, warning/instructional, compliance/tracking, security, wire wraps, insulation, bonding, noise damping, sealing, barrier, hazardous chemical, and graphic kits.
