Flexcon® MedFlex® Plus Product Line

Reliable medical device labeling solutions

MedFlex® Plus polyester product constructions deliver reliable performance for Class I and Class II medical device labeling. Each material has been rigorously evaluated by UL, including testing on multiple surface types to ensure strong, long-term adhesion.

MedFlex® Plus products also meet IEC 60601-1 3rd edition durability requirements, demonstrating proven resistance to today's cleaning and disinfection processes—including six commonly used healthcare cleaning agents. These product constructions can be readily adopted into your UL listing.

Exceeds marking durability requirements with 6 additional cleaning agents per IEC 60601-1

Key Benefits

- Cross platform printability for flexibility across workflows
- Exceptionally fine print and reliable barcode scanning with smooth 2 mil polyesters
- Smudge proof, abrasion resistant thermal transfer print durability from robust gloss and matte topcoats
- Long-term adhesion that prevents label lift using a permanent, solvent-based acrylic biocompatible adhesive
- Sustainable roll-form converting enabled by a 50 lb. release liner made with up to 30% post-consumer waste
- UL 969 Recognition, IEC 60601-1 durability compliance, and UL Verification for six cleaning agents keeps labels readable and intact
